PROFESSIONAL SUMMARY

Full-Stack Software Engineer building backend services with **Java, Spring Boot, and Node.js**, paired with modern frontend work in **React.js and Next.js**. Experienced designing RESTful APIs, modelling relational and NoSQL databases (**MySQL, PostgreSQL, MongoDB**), shipping real-time features over **WebSockets**, and cutting latency with **Redis caching**. Comfortable with DevOps basics (**AWS EC2, Netlify**) and skilled at debugging complex third-party API integrations under pressure. B.E. Computer Science (2026) with a strong grounding in data structures, algorithms, and software engineering practice.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+), TypeScript, SQL

Backend & APIs: Spring Boot, Spring MVC, Hibernate, JDBC, REST & GraphQL APIs, JWT, OAuth 2.0, Session-Based Auth, Node.js, Express.js, NestJS (basics)

Frontend: React.js (Hooks, Component Architecture, Context API), Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Databases & Data Layer: MySQL, PostgreSQL, MongoDB, Relational DB Design, Normalization (3NF), Indexing, Query Optimization, Redis Caching

DevOps & Cloud: AWS Basics (EC2), Netlify & Vercel Deployments, Concurrency & Multi-threading Fundamentals

Tools & Workflow: Git/GitHub, Postman (API testing & debugging), Jira, Maven, Claude & ChatGPT (AI-assisted debugging & code review)

PROJECTS

Smart Tourism Guide App | [LINK](#) | • *Spring Boot* • *MySQL* • *Redis* • *WebSockets* • *React.js* **Feb 2026**

- Designed and implemented REST endpoints in **Spring Boot** for a dual-role (Admin/User) booking platform with clean request/response JSON payloads and structured error handling.
- Integrated the **Google Maps API**, debugging integration failures through network analysis and log tracing to resolve data-flow issues.
- Cut query load by adding strategic **MySQL indexes** and a **Redis caching** layer, and delivered real-time booking status updates over **WebSockets**.

Team Task Manager | [LINK](#) | • *Java* • *Spring Boot* • *Hibernate* • *MySQL* • *React.js* **Apr 2026**

- Built a full-stack REST API with **Spring Boot, Hibernate, and MySQL**, managing task-state transitions across a Kanban-style pipeline using strong OOP design principles.
- Designed reusable, prop-driven **React.js** components with clean API contracts and clear separation of concerns.
- Ran code reviews that caught edge cases and raised component quality before merge.

File Storage Platform | [LINK](#) | • *Java* • *Spring Boot* • *MongoDB* • *React.js* • *Tailwind CSS* **Sep 2025**

- Developed backend microservices and REST endpoints with **Spring Boot and MongoDB** for secure file upload, download, and link-sharing.
- Resolved **Razorpay payment webhook** failures during tier upgrades by isolating root causes from network requests and API logs in **Postman**.
- Built a responsive **React.js and Tailwind CSS** frontend with end-to-end debugging across the client-server boundary; deployed on **Vercel**.

EDUCATION

Chandigarh University — B.E., Computer Science and Engineering

Jun 2026 | **CGPA: 7.36**

DAV Kapildev Public School — Senior Secondary (Physics, Chemistry, Mathematics)

May 2022 | **79.8%**

CERTIFICATIONS & LANGUAGES

- Java Spring Framework & Spring Boot Professional Certification — Udemy (Dec 2025)
- JavaScript Programming (JS PROOF) — MetaCrafters (Sep 2024)
